

All rostrums should be a
minimum height of 18 inches

Syd Lawrence Orchestra

STAGE PLAN

SLO require one pair of monitor wedges on a single feed at the front of the stage. One riser for drums extended out to stage left for 4 trumpets with stands. No bass riser needed. We carry all our own mics, stands and cables and will use the house mixing desk. We also like to project video on to the back of the stage (where available) from a laptop at the mix position using HDMI or SVGA with audio direct to the mixing desk. Please advise in advance should any extra charges be incurred. We also require 3 lighted heavy-duty music stands for bass and drums. 13A outlets front and back each side of the stage.
